

Nicholas Arcuri

Software Engineer III

Brooklyn, NY · (848) 480-3425 · hello@nickarcuri.com · nickarcuri.com · github.com/nikarc

SUMMARY

Full-stack software engineer with 10+ years of experience specializing in JavaScript, Node.js, React, and SQL. Based in NYC with a track record of building production-grade web applications for high-profile clients. Experienced across the entire product lifecycle, from architecture to deployment.

EXPERIENCE

Software Engineer III | **Big Human** Aug 2025 – Present · New York, NY

- Architected and developed a second full-stack e-commerce platform for RockefellerCenter.com, integrating Ventrata's Octo API for real-time booking and payment processing with Sanity headless CMS for content management.
- Built with Next.js 15 (App Router), React 19, TypeScript, and Tailwind v4 in a pnpm monorepo architecture.

Software Engineer II | **Big Human** Aug 2024 – Aug 2025 · New York, NY

- Contributed to the development and deployment of a robust Python-based GraphQL server for Fusion Worldwide, marking their inaugural foray into the e-commerce space.
- Worked across Node.js, React.js, and GraphQL to deliver scalable backend and frontend solutions for client projects.
- Oversaw the planning and implementation of a brand new ticketing integration for Rockefeller Center's *Top of the Rock* and *Rink* attractions, serving millions of users per month.

Software Engineer I | **Big Human** Oct 2021 – Aug 2024 · New York, NY

- Built and shipped features for multiple client projects including fitness and tourism platforms, utilizing Node.js, React.js, and related technologies.
- Quickly ramped up to own full-stack feature development across simultaneous client engagements.

Software Engineer | **Spartan** Apr 2020 – Sep 2021 · Brooklyn, NY

- Built and deployed a Shopify Plus e-commerce platform for spartan.com, an ultra-endurance racing company.
- Integrated Contentful CMS for dynamic content management across the storefront.

Full Stack Engineer | **One Rockwell** Jan 2019 – Mar 2020 · New York City Area

- Launched and maintained a Shopify-based e-commerce site for global ecommerce brands like tula.com, verabradley.com, and samedelman.com.
- Implemented a Kubernetes-orchestrated microservices architecture with RabbitMQ message queuing.
- Handled order processing, inventory management, and shipping webhook integrations using Node.js.

Full Stack Developer | **DevTheWeb** Jan 2015 – Jan 2019 · New York City Area

- Built a comprehensive live performance ticketing and seating platform for onthestage.com from the ground up, using a Node.js/Express.js backend, AngularJS frontend, and MongoDB/MySQL databases.
- Deployed on AWS cloud infrastructure and extended the platform with an iOS Swift mobile application.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Node.js, React.js, Next.js

Styling & APIs: Tailwind CSS, GraphQL, REST APIs

Databases: SQL (PostgreSQL, MySQL), MongoDB

Platforms & Tools: Sanity CMS, Contentful CMS, AWS, Kubernetes, RabbitMQ, Docker, Git
